

Update from the Field – July 2017

A monthly analysis note from the energy storage experts

Table of Contents

Executive Summary	2
Table of figures	4
New regulations and initiatives discussed this month	5
Americas	5
Massachusetts joins California, Oregon, and other states with its Energy Storage Target	5
Update on California's Self-Generation Incentive Program (SGIP): a rather stagnant Step 2	5
Europe	6
National Grid and the future of balancing services:	6
Asia / Oceania	7
Australian battery energy storage is starting to get serious	7
Projects updates and announcements	7
Overview of the 2017 market for utility-scale projects: large-scale battery announcements are picking up speed	7
Projects commissioned this month	8
Projects announced this month	9
Projects tendered this month	11
Focus of the Month I: Australia's rapid accumulation of battery energy storage systems and the ever-increasing magnitude of megawatts	12
Tesla and Neoen win South Australian 100 MW battery tender: Reactions and responses	12
Battery affairs across Australia – Battery standards and regulations continue to develop	15
Recent regulatory and safety considerations concerning residential batteries in Australia	16
Focus of the month II: Acquiring energy storage system integrators	17
Introduction	17
Building know-how and a portfolio of energy storage projects takes years	18
Strategic acquisition of energy storage integrators: software, hardware, and know-how	18
An overview of the system integrator space: small players still compete with large players, but for how long?	20
General example of a utility scale energy storage project and cost breakdown by services	21
Cost breakdown for a 10 MW / 11MWh typical utility scale energy storage project	22

Update from the Field – July 2017

A monthly analysis note from the energy storage experts

Table of figures

Figure 1. SGIP Step 2 Developer caps suggest Tesla, ENGIE, Swell, and Stem are top runners	6
Figure 2. Projects announced and commissioned in 2017	8
Figure 3. Table of largest battery energy storage systems including Australia's planned installations of utility scale batteries	14
Figure 4. Largest battery energy storage system projects and their current status	15
Figure 5. Utility scale energy storage system integrators ranked by their installed and contracted projects (in terms of MW)	17
Figure 6. Major Energy Storage System Integrator evolution timeline	18
Figure 7. Recent acquisitions (or mergers) of energy storage software and hardware integrators..	20
Figure 8. Major energy storage system integrators as a function of reference portfolio (MW) and recent company turnover (M USD)	21
Figure 9. Cost breakdown for utility scale energy storage project	22
Figure 10. Repartition of energy storage utility-scale project costs	23
