Energy storage: a new asset class for European lenders and investors
Training session on 23rd October
Paris, Regus Center - Gare du Nord station

Contents:

- 9:00 – 10:00 Registration and welcome coffee
- 10:00 – 11:15 **Introduction to energy storage**
- Existing technologies: lithium-ion and beyond
 - Benchmarking technologies: pros and cons
 - Lithium-ion based systems: current and future installation costs, O&M
 - Potential applications for energy storage
 - Battery energy storage systems supply chain
 - Market players: leaders in Europe and elsewhere
- 11:15 – 11:30 Coffee break
- 11: – 13:00 **Accessible revenues in continental Europe for an energy storage system:**
- Frequency regulation
 - Capacity mechanisms
 - Arbitrage on the wholesale markets
- 13:00 – 14:00 Networking lunch, provided by Clean Horizon
- 14:00 – 16:00 **Illustration of the development of an energy storage market: the UK**
- Lack of grid inertia and the Enhanced Frequency Response tender
 - The UK capacity market and its specificities for storage
 - Other frequency regulation products (FFR, new frequency response products)
 - Current development and new market strategies (balancing mechanism, wholesale electricity markets)
- 16:00 – 16:15 Coffee break
- 16:15 – 18:00 **Financing energy storage projects**
- Technology risks: what happened with the fires in Korea (and elsewhere)?
 - Commodity risks
 - Merchant revenue risks : how to address them?
 - Will EVs disrupt the flexibility markets?
 - Financing trends

Price: 1000 € (VAT excluded)
