

CLEANHORIZON

The Energy Storage Experts

Clean Horizon's Market Segment Watch The market for Energy Storage in Africa

- Snapshots of 8 countries of 496 TWh energy consumption
- More than 8,320 MUSD of intermittent renewables funded up to January 2018.

Report price:

1500 €

Table of Contents: Energy Storage in Africa

List of Figures.....	4
List of Tables.....	4
List of Acronyms	5
Introduction	6
1 The market for energy storage in Africa	7
1.1 Investments to increase the electrification rate and reliability of the network, and develop renewable energy sources	7
1.1.1 Electrification rate, intermittent renewables penetration and targets	7
1.1.2 Ranking of the most interesting countries for energy storage deployments in Africa ...	11
1.2 Business models for energy storage and the potential for utility-scale energy storage in African countries	13
1.2.1 On-grid utility scale energy storage coupled with renewables	14
1.2.2 Off-grid PV and storage systems (microgrids) for rural electrification	16
1.2.3 PV plus storage for commercial and industrial consumers	18
1.3 Development Financing Institutions (DFIs) are becoming increasingly proactive in the development of energy storage	19
1.3.1 DFI involvement differs depending on the project size.....	20
1.3.2 DFIs are unequally present across the continent	21
1.3.3 Overview of the actions undertaken by DFIs involving energy storage	23
2 Power Pools	25
2.1 Main organizations.....	26
2.1.1 Continental and regional institutes in charge of energies policies	26
2.1.2 Some DFIs on the continent	27
2.1.3 Institutes.....	28
2.2 Power Pools.....	29
2.2.1 SAPP	30
2.2.2 EAPP.....	31
2.2.3 WAPP	32
2.2.4 PEAC.....	33
2.2.5 COMELEC (Maghreb Electricity Committee)	34
3 Countries' snapshots	35
3.1 South Africa's snapshot.....	36
3.2 Morocco's snapshot'	37
3.3 Egypt's snapshot.....	38
3.4 Ethiopia's snapshot	39
3.5 Mauritania's snapshot.....	40
3.6 Madagascar's snapshot.....	41
3.7 Kenya's snapshot.....	42
3.8 Nigeria's snapshot	43

List of Figures

Figure 1: Africa Map and electrification rates between northern and sub-Saharan Africa	8
--	---

Figure 2: Current electrification rates and penetration of wind and solar in 2017 in Africa.....	9
Figure 3: Scores of four representative countries in Africa (significance funds for renewables, electricity market size, current intermittent renewables penetration and intermittent renewables targets).....	12
Figure 4: Top 15 countries which present the highest potential for energy storage deployment	13
Figure 5: DFIs and utility type for selected African countries	22
Figure 6: DFIs funding toward wind & solar (only considered WB, AFD, and Norfund)	23
Figure 7 : African existing transmission lines allowing cross-border interconnection for regional grid	25
Figure 8 : African planned transmission lines allowing cross-border interconnection for regional grid	26
Figure 9 : Africa’s energy landscape.....	29
Figure 10 : Regional electricity market status.....	30
Figure 11 : Imported and exported energy in WAPP market.....	33
Figure 12 : Snapshot of South Africa energy status	36
Figure 13 : Snapshot of Morocco energy status	38
Figure 14 : Snapshot of Egypt energy status	38
Figure 15 : Snapshot of Ethiopia energy status.....	39
Figure 16 : The snapshot of Mauritania energy	40
Figure 17 : The energy snapshot of Madagascar	41
Figure 18 : The snapshot of Kenya energy profile.....	42
Figure 19 : Snapshot of Nigeria energy status	43

List of Tables

Table 1 : Solar & wind deployment targets or renewables penetration targets in a selection of African countries. Unless otherwise indicated, percentages in expected developments column represent the ratio of RE in the country’s energy production....	10
Table 2 : Some utility-scale projects in Africa involving storage.....	15
Table 3 : Examples of mini and/or micro-grid project involving storage in Africa	17
Table 4 : A shortlist of DFIs present in Africa	20
Table 5 : DFIs having issued a tender including utility scale storage	24
Table 6 : Summary of regional organizations in charge of energy policies in Africa	27
Table 7 : DFIs in Africa	27
Table 8: Funds provided by WB, AFD, and Norfund during the period 2010-end-2017 for wind and solar	28
Table 9 : Summary of regional organizations in charge of energy policies	28
Table 10 : Trade volume and market price in the SAPP market (SAPP market monthly performance report (March 2018))	31
